

Press Release

Kemtah Awarded IT Services contract by major west coast university medical center

Albuquerque, NM

May 12, 2008

The Kemtah Group, a leading provider of IT Infrastructure Transformation services, today announced that it has been awarded an IT project that involves the development and testing of a comprehensive IT disaster recovery plan for a major University's medical center. Kemtah will be setting the policies, procedures, and technologies to develop the appropriate level of operations and timeframes in case of a disaster. The planning will include cost/benefit analyses, risk assessments, and regulatory compliance. The project scope includes all phases from the original charter to implementation of the plan.

With this tailored disaster recovery plan and the subsequent disaster readiness test, the medical center will be prepared for the unexpected and ready to recover their data and resume patient care immediately should a disaster strike. Kemtah specializes in providing the talent and capabilities to lead IT Infrastructure projects that streamline operations and deliver value to the customer.

"It is always gratifying to have a major customer confidently engage Kemtah to provide IT vision and leadership for a mission critical IT project. We look forward to performing this project in an outstanding and value added fashion," said Stephen V. Wade, Kemtah's President.

About The Kemtah Group

Headquartered in Albuquerque, New Mexico, the Kemtah Group is a premier IT Transformation Services and Support firm delivering IT Service Management and technology support throughout North America. The company's footprint of service locations throughout the U.S., Canada and Latin America enable the Kemtah Group to provide local, reliable, cost-effective IT support.
