

Press Release

Kemtah Exec to be Among Presenters at DOE National IT Conference

Albuquerque, NM

May 15, 2007

The Kemtah Group announced that President, Steve Wade, will be an invited presenter at the DOE's National Laboratory Information Technology conference. The conference will be held June 10 -13 in Albuquerque, NM. Mr. Wade will discuss the emerging technologies, agency consolidation, IT centralization, rising demands, and scarce resources that are driving governments to rethink their operations. He will also explore the challenges that an aging workforce places on both governments and industry. And finally, he will address the importance of enterprise integration and data sharing to meet regulatory and technological changes.

The Kemtah Group is focused on helping the DOE enterprise transform their IT services to reduce complexity and improve cost effectiveness. Kemtah offers IT experts who use ITIL and other frameworks to help DOE entities implement best practices for IT Service Management.

This year's NLIT Summit will draw representatives and speakers from across the National Labs to discuss the latest topics in information technology, including cyber security, emerging technologies, standardization, and management of policy, assets, projects, and customer relationships.

About The Kemtah Group

Headquartered in Albuquerque, New Mexico, the Kemtah Group is a premier IT Transformation Services and Support firm delivering IT Service Management and technology support throughout North America. The company's footprint of service locations throughout the U.S., Canada and Latin America enable the Kemtah Group to provide local, reliable, cost-effective IT support. Our experts help commercial and government organizations effectively optimize the people, processes, and technologies that comprise their IT departments using global standards such as ITIL, CoBIT, and ISO.
